FLORIDA LABOR MARKET TRENDS

FLORIDA DEPARTMENT OF LABOR AND EMPLOYMENT SECURITY • BUREAU OF LABOR MARKET INFORMATION

Highlights:

- Nonagricultural employment in Florida grew by 3.6 percent or 185,100 new jobs to reach a total of 5,334,800 in October. Florida's annual job growth rate remained as the fastest of the nation's eleven most populous states. California was second with a job growth rate of 2.6 percent. Overall job growth has been slowing in Florida during 1989.
- Services employment led all sectors with a fastest job growth rate (4.7 percent) over the year, the highest number of new jobs (+67,600), and the largest overall level of employment (1,498,900) in October. Health services accounted for 1/3 of total services employment growth.
- Construction remained as the only major industry to lose jobs over the year, with a loss of 3,800 or 1.1 percent. Part of this is due to slower overall economic growth in the state, past overbuilding activity, and anticipations of future declines in interest rates.
- Florida's unemployment rate stood at 5.8 percent representing 364,000 jobless Floridians out of a labor force of 6,259,000 in October. This was 0.5 percentage points higher than the national rate of 5.3 percent. The Gainesville MSA (3.2 percent) recorded Florida's lowest rate while the Panama City MSA recorded the highest rate (10.3 percent) in October.

FLORIDA'S NONAGRICULTURAL EMPLOYMENT

SEASONALLY ADJUSTED, OCTOBER 1988–OCTOBER 1989

* = Less than one-tenth of one percent.

(1) - These series do not have a consistent seasonal pattern and consequently do not pass criteria for seasonal adjustment. Total nonagricultural employment is the sum of all major industries and is not adjusted. Durables and nondurables in manufacturing and wholesale and retail in trade may not add to total due to lack of adjustment to durables and wholesale.
